«Meridian» – is the largest manufacturer of ready to eat products from fish and seafood on the Russian market. Manufacturing takes 4 floors and consists of 8 production units, equipped with modern facilities. Such capacities can produce more than 25 000 tonnes of ready to eat products per year and more than 80 tons per day.

One of the main competitive advantages of «Meridian» – a wide range of products. The company's portfolio more than 10 product categories and more than 300 SKUs.

«Meridian» – is the only Russian manufacturer of fish and seafood, which keeps familiar from childhood recipes, while actively develop product innovations.

For more than 35 years history of the company, «Meridian» was and still is a pioneer of Russian fish and seafood market. Based on modern trends, technologists of company are developing new products, that have no analogues on the market, creating a new customer's preferences and consumption choices.

«Meridian» was the first manufacturer who has launched the first line for the production of «Snow crab»; the first one who has adjusted release of seafood and now actively developing and promoting this category on the market. Since 2010, the company is the absolute leader in the «Seafood» category on the entire territory of the Russian Federation.

In 2012, product line «Meridian - ECO», which does not contain colorings and preservatives, has appeared in the range of «Meridian» products and now it is rapidly gaining popularity.

The rich experience of experts contributes to the stable growth of the company. Among the leading players in Russian fish market brand «Meridian» shows the highest growth rate of appreciation and consumption.
